

July 12, 2010

**Subject: API Tank Upgrading**

The Alberta Fire Code does not permit use of API 12F tanks. There are many of these tanks installed in Alberta where the Fire Code has regulatory jurisdiction. The Alberta government issued a Variance from the Fire Code permitting API 12F tanks to be upgraded by December 31, 2011. The PTMAA is hosting a meeting to discuss issues related to the upgrading program. You are invited to attend this free seminar:

10:00 AM – 12:00 Noon  
Tuesday, August 24, 2010  
Imperial Room, Delta Edmonton South  
4404 Gateway Blvd., Edmonton

The meeting will bring together tank manufacturers, engineers that will assist with applications, tank owners, vent vendors and government officials. The focus of the meeting will be emergency venting and you'll come away with an improved understanding of venting requirements and modifications that will meet Code.

There is no charge for the seminar but registration is required by calling or emailing Connie at the PTMAA office by August 16th: Phone (780) 425-8265 Toll-Free 1-866-222-8265 [connie@ptmaa.ab.ca](mailto:connie@ptmaa.ab.ca)

Until we see you, we hope you have a fine summer.

Don Edgecombe
